## Author Explores Rise of the Anti-Hero in Society

What if the decisions people make are not entirely their own? If the shows and movies they watch were written with the intent to shape their opinions on matters of life and death?

That's the premise of author Lynne Constantine's latest book "The Veritas Deception", a thriller, inspired by Constantine's career in marketing and advertising. Combining the biblical history and well-known relics of books like THE DA VINCI CODE with the political aspects of Brad Thor's books, THE VERITAS DECEPTION weaves ancient history and modern times, including a conspiracy that encompasses politics, polemic issues like abortion, euthanasia, vaccinations; reality TV, and the rise of the antihero.

The book begins with the death of a US Senator. His widow, Taylor, discovers that he was murdered and his entire identity fabricated. To uncover the truth, she is forced to rely on the only man who can help her, investigative reporter Jack Logan. The key to unraveling a complex web of lies is a set of ancient relics, dating back to the time of Christ. But what do these relics have to do with a senator's death?

Allies turn to foes when Jack and Taylor discover that those closest to them are part of the conspiracy and that they too have been manipulated. How long has a puppet master been pulling their strings—and will Jack and Taylor trust the right people long enough to win what becomes a colossal battle for souls?
